- Learning English
- Listening to music
- Watching Movies

Education

- High School – Complete (2019)

I am passionate about

- Software Engineering
- Teaching others
- Learning New things

Employment

Freelancer (2019 – present)

Self-taught full-stack software engineer with over 5 years of experience building modern, scalable web and software applications. Proven ability to deliver custom solutions that help businesses solve problems and grow online.

Core Technical Skills:

- **Application Design** – Architecting modular, scalable applications for maintainability and user experience
- **Database Design** – Designing efficient, normalized schemas with clear relational structures
- **Object-Oriented Programming (OOP)** – Implementing abstraction, encapsulation, and inheritance for clean code architecture
- **Responsive Web Development** – Building cross-device user interfaces using modern CSS and mobile-first principles
- **Custom API Development & Integration** – Designing RESTful APIs and integrating third-party services to extend system functionality
- **Full-Stack Web Development** – Developing and managing end-to-end system flows including front-end, back-end, database, and deployment
